

Health 11/01/2024

Funding Opportunity:

**Bidirectional Influences Between Adolescent Social Media Use and Mental Health
(R01 and R21 Clinical Trial Optional)**

FON:

RFA-MH-25-205; RFA-MH-25-206

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals that focus on understanding bidirectional relationships between social media use and adolescent mental illness, psychiatric symptoms, and risk or resilience for psychopathology, as well as social media as a platform for facilitating the identification of adolescents with or at risk for mental illness, for encouraging appropriate mental health service use, and for delivering preventive and therapeutic interventions. Award mechanisms include [R01](#) and [R21](#).

Action:

Proposals are due January 28, 2025. An estimated \$5 million is available to fund five to six awards.

**Biomedical Research Environment and Sponsored Programs Administration
Development (BRE-SPAD) Program (UC2- Clinical Trial Not Allowed)**

FON:

PAR-24-268

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to promote broad participation in biomedical research by supporting resource-limited institutions to conduct research, enhance their research environments, and increase sponsored programs administration capacity.

Action:

Proposals are due January 27, 2025. Awards may vary.

Funding Opportunity:

Development of Biomarkers or Composite Biomarkers for Neurological and Neuromuscular Disorders (R61-R33 - Clinical Trial Optional)

FON:

PAR-25-024

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to promote the development of fit-for-purpose candidate biomarkers and composite biomarker that enable more efficient clinical trials advance therapeutic development or clinical practice help guide clinical care decisions. Specifically, the goal of this phased funding mechanism is to first identify or confirm candidate biomarker(s) or biomarker signatures using human samples and/or data, followed by an independent retrospective or prospective clinical study to conduct initial clinical validation of the biomarker/signature's clinical utility for one or two defined Context(s) of Use.

Action:

Proposals are due February 21, 2025, June 20, 2025, and October 20, 2025. Program expires January 8, 2028.

Dissemination and Implementation Research in Health (R03 Clinical Trial Not Allowed)

FON:

PAR-25-233

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to support studies that will identify, develop, and/or test strategies for overcoming barriers to the adoption, adaptation, integration, sustainability, scale-up, and spread of evidence-based interventions, practices, programs, tools, treatments, guidelines, and policies (herein referred to collectively as evidence-based interventions). Studies that promote equitable dissemination and implementation of evidence-based interventions among underrepresented communities are encouraged.

Action:

Proposals are due February 16, June 16, and October 16, annually through January 8, 2028.

Funding Opportunity:

Pilot Projects Investigating Understudied Proteins Associated with Rare Diseases (R03 Clinical Trial Not Allowed)

FON:

PAR-25-122

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals for pilot projects to elucidate a role for understudied proteins in rare disease. Awards will support generation of preliminary data and/or tools around eligible understudied protein(s). A list of eligible proteins is provided and are members of druggable protein families that have a known association with a rare disease.

Action:

Proposals are due February 16, June 16, and October 16, annually through November 17, 2027.

Screening and Functional Validation of Genomic Variants Associated with Human Congenital Anomalies (R01 Clinical Trial Not Allowed)

FON:

PAR-25-185

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to promote the screening, functional validation and characterization of congenital anomaly-associated genetic variants identified through public facing databases and individual efforts using in-silico tools, appropriate animal models, in vitro systems or multi-pronged approaches. This initiative addresses a challenging gap between identifying sequence variations of potential interest and recognizing which of those variations have functional effects on the phenotype of interest.

Action:

Proposals are due February 5, June 5, and October 5, annually through January 8, 2028. Awards may vary.

Health 10/29/2024

Funding Opportunity:

CCRP Initiative: NIH Countermeasures Against Chemical Threats (CounterACT) Translational Exploratory Developmental Research Projects (R21 Clinical Trial Not Allowed)

FON:

PAR-25-114

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals supporting translational exploratory/developmental research that directly advances the discovery of novel treatment strategies, i.e., medical countermeasures, that address serious morbidity and mortality after acute exposure to highly toxic chemical threats. Chemical threats are toxic compounds that could be used in a terrorist attack or accidentally released from industrial production, storage, or shipping. They include traditional chemical warfare agents, toxic industrial chemicals, pesticides, and ultra-potent synthetic opioids.

Action:

Applications are due May 30, 2025. Multiple awards of up to \$275,000 each are anticipated.

Funding Opportunity:

Development of Resources and Technologies for Enhancing Rigor, Reproducibility, and Translatability of Animal Models in Biomedical Research (R01 Clinical Trial Not Allowed)

FON:

PAR-25-076

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notices seeking proposals for research projects aimed at developing and implementing broadly applicable technologies, tools, and resources for validating

animal models and enhancing rigor, reproducibility, and translatability of animal research. Projects should be hypothesis driven with strong preliminary data, and proposed studies, models, resources, or technologies must either address research interests of multiple NIH Institutes, explore multiple organ systems, or be applicable to diseases and processes that impact multiple organ systems.

Action:

Proposals are due February 5, 2025 or June 5, 2025. Award amounts vary.

Funding Opportunity:

Implementation Research for Multi-morbidity Management in the Context of Non-communicable Diseases in Low- and Middle-Income Countries and US Tribal Populations (R61 R33 Clinical Trial Required) and (R01 Clinical Trial Optional)

FON:

PAR-25-223

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals for implementation research that aims to improve the availability of effective, equitable, efficient, integrated, patient-centered, safe, and timely care for people living with multiple long-term conditions (non-communicable disease multimorbidity) in low- and middle-income countries and/or within American Indian/Alaska Native populations in the United States. Projects involving innovative approaches to identifying, understanding, developing, and implementing strategies for overcoming barriers to the adoption, adaptation, integration, scaling-up, and sustainability of evidence-based interventions, and studies to advance dissemination and implementation research methods and measures into application are encouraged.

Action:

Applications are due February 7, 2025 and November 5, 2025. Award amounts vary.

Funding Opportunity:

Maternal and Child Health Public Health Catalyst Program

FON:

HRSA-25-025

Agency:

U.S. Department of Health and Human Services, Health Resources and Services Administration

Item:

Notice seeking proposals for one of two distinct opportunity tracks: either curriculum start up or curriculum expansion in maternal and child health (MCH). The overall purpose of the program is to 1) recruit and train diverse graduate students in MCH public health, 2) expand MCH curriculum and degree offerings within schools and programs of public health where there is currently a lack of, or limited, MCH offerings, 3) build MCH faculty capacity within existing schools and programs of public health.

Action:

Proposals are due January 23, 2025. An estimated \$1.35 million is available to fund up to 10 awards for up to five years.

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to fund research focused on the neurological and/or mental health-related manifestations of infection-associated chronic illnesses, including the post-acute sequelae of COVID-19 as well as other chronic illnesses with a potential infectious trigger (post-treatment Lyme Disease, myalgic encephalomyelitis/chronic fatigue syndrome, postural orthostatic tachycardia syndrome, post-viral fatigue syndromes, etc.). Projects that investigate common neurological and/or mental health-related mechanisms across multiple infection-associated chronic illnesses would be of particular interest, although this is not a requirement (i.e., applications can focus on a single condition). Award mechanisms include [R01](#) and [R21](#).

Action:

R01 applications are due February 5, 2025; June 5, 2025; and October 5, 2025. R21 applications are due February 16, 2025; June 16, 2025; and October 16, 2025.

Interventions to expand cancer screening and preventive services to ADVANCE health in populations that experience health disparities (R01, Clinical Trial Required)

FON:

PAR-25-098

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to address barriers and facilitators that impede use or uptake of cancer screening and preventive services in populations that experience health disparities. Interventions should include screening, preventive services, or other healthcare processes, including timely follow-up of abnormal findings, and referral to accessible care. Projects are encouraged to leverage collaborations with community partners and service providers. Interventions should address barriers and facilitators at two or more of the following levels: patient, clinician, healthcare setting, and neighborhood/community.

Action:

Proposals are due February 5, June 5, and October 5, annually until January 8, 2027.

Promoting a Basic Understanding of Chemical Threats to Skin

FON:

PA-25-093

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals for fundamental research projects that will contribute to a basic understanding of skin injuries caused by chemicals of concern, that have been identified as public health threats. Ideally, this initiative will further knowledge of the commonalities of such injuries and identify potential shared signaling pathways and

therapeutic targets for medical countermeasure development. This program will support investigators beginning the preparatory steps toward this new line of research, meaning applicants do not need to present preliminary data supporting the proposed study in concept, publication records, or specific skills and proficiency in experimental execution in the chemical medical countermeasure field. However, the investigator should demonstrate prior experience in wound healing research and general knowledge relating to skin injury and healing.

Action:

Proposals are due annually on February 16, June 16, and October 16 until January 8, 2028. An estimated \$1.25 million is available to fund up to five awards.

Mitochondrial-associated Mechanisms of Neuropathological and Immunodeficient Aging in the Context of HIV and SUD (R01 and R21 Clinical Trials Not Allowed)

FON:

RFA-DA-26-009; RFA-DA-26-010

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to promote research investigating protective and pathogenic mechanisms at the nexus of mitochondria function and aging in the context of HIV infection and exposure to addictive substances. We anticipate this foundational knowledge could be leveraged to develop targeted therapies and improve outcomes in people aging with HIV, substance use and addiction. Awards mechanisms included are [R01](#) and [R21](#).

Action:

Proposals are due March 10, 2025. An estimated \$3 million is available to fund three to six awards.

Research Experiences and-or Mentoring Networks through Research Education to Enhance Clinician-Scientists' Participation in NIDCDs Research (R25 Clinical Trial Not Allowed)

FON:

PAR-25-020

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to support research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that help recruit individuals with specific specialty or disciplinary backgrounds to research careers in biomedical, behavioral and clinical sciences. To accomplish the stated over-arching goal, this NOFO will support educational activities with a primary focus on: Research Experiences and Mentoring Activities.

Action:

Proposals are due January 29 and September 29, annually through September 30, 2027.

The Impact of Stressors on the Biological Mechanisms of Aging and Other Aging-Associated Outcomes in Experimental Model Systems (R61-R33 Clinical Trial Not allowed)

FON:

RFA-AG-25-019

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals proposing research that incorporates exposures to a stressor(s) during the post-development period ("adulthood") into studies of aging processes. Research proposed in the initial, exploratory (R61) phase will seek to determine whether exposure to a stressor(s) (e.g., physical, social, and/or environmental stressors of well-defined duration, intensity, and timing) during adulthood results in measurable changes in one or more of the hallmarks of aging. The second, developmental (R33) phase will then

expand upon findings yielded in the R61 phase to determine the impacts of the stressor(s) on lifespan, healthspan, resilience, and/or interactions with other “input variables” such as genotype, diet, interventions, etc.

Action:

Optional letters of intent are due October 7, 2024. Proposals are due November 7, 2024. An estimated \$3.25 million is available to fund up to eight awards.

Arthritis, Focused Research Award

FON:

HT942524ATRPFRA

Agency:

Defense

Item:

Notice seeking proposals for conceptually innovative, high-risk/potentially high-reward research that could ultimately lead to critical discoveries and/or improvements in patient

care or quality of life for people impacted by arthritis. Research addressing all types of arthritis is encouraged including but not limited to osteoarthritis, post-traumatic arthritis, inflammatory arthritis, juvenile arthritis, and rheumatoid arthritis. Applicants are encouraged to address sex as a biological variable and understudied arthritis types. Additionally, applicants are encouraged to consider whether large data sets or existing studies/consortia can be leveraged to maximize the potential impact of proposed studies. Applicants must address how the proposed research may eventually impact patient care and reduce the burden of disease. It is expected that any research findings would benefit Service Members, their Families, Veterans, and the general public.

Action:

Proposals are due October 30, 2024. An estimated \$2.5 million is available to fund four awards.

RFA-CA-24-024

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to provide scientific leadership in development and conduct of early phase cancer prevention clinical trials as well as in the management and analysis of the data.

Action:

Proposals are due October 31, 2024. An estimated \$8.75 million per year is available to fund up to five awards over six years.

Collaborative Science to Achieve Disruptive Innovations in Dental, Oral and Craniofacial Research (RM1 Clinical Trial Not Allowed)

FON:

RFA-DE-25-004

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals for integrated research teams to address challenging questions with the potential to significantly advance dental, oral and craniofacial fields of research. Ideal teams will be transdisciplinary, made up of three to six investigators, and will address priority areas including: Early translational and clinical studies in the development of non-opioid pharmacotherapies or non-pharmacological treatments including behavioral approaches; tissue engineering or regenerative medicine approaches to provide major translational advances for replacing or repairing damaged tissues; observational studies of human behavior that infuse additional data sources and integrate these findings into comprehensive prevention, early detection, and treatment or management strategies; accessible technologies that draw on best practices from other fields of medicine; approaches to advance prophylactic and therapeutic strategies to manage HIV/AIDS oral manifestations and comorbidities.

Action:

Proposals are due November 19, 2024. An estimated \$3 million per year is available. Award amounts are up to \$750,000.

Funding Opportunity:

Investigating Mitochondrial-Nuclear Communication in AD-ADRD (R01 Clinical Trial Not Allowed)

FON:

RFA-AG-25-026

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals that investigate mitochondrial-nuclear communication in the context of neurobiology and Alzheimer's disease (AD) and AD-related dementias (AD/ADRD). This research will transform our understanding of how mitochondrially derived metabolites can impact nuclear gene expression and how changes to nuclear function can impact mitochondrial activity.

Action:

Proposals are due November 7, 2024. Optional letters of intent are due October 7, 2024. An estimated \$4 million is available to fund eight awards.

Funding Opportunity:

National Institute on Drug Abuse (NIDA) Animal Genomics Program (U01 – Clinical Trial Not Allowed)

FON:

PAR-24-269

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals to identify genetic, genomic, and molecular (epi)genetic variants that underlie neural and behavioral processes and phenotypes relevant to substance use disorder (SUD) risk, the SUD trajectory and SUD comorbidities. This opportunity supports research that links genetic, genomic and molecular mechanisms to neural circuit function and behavior. NIDA encourages applications that take genomics, multi-omics, data-based, and/or artificial intelligence/machine learning approaches that integrate multi-level 'omics data, delineate gene networks, and/or uncover the function of known or newly discovered genetic or epigenetic variants. Other areas of interest include variant identification at the circuit level and the application of neuroscience to variant identification studies in tissues and cells. NIDA expects these studies to uncover novel mechanisms that contribute to various stages across the SUD trajectory and inform future studies about potential targets and therapeutic strategies for addiction.

Action:

Proposals are due February 11, 2025. Award amounts will vary.

Optimization of Genome Editing Therapeutics for Alzheimer's Disease-Related Dementias (ADRD) (U01 - Clinical Trials Not Allowed)

FON:

RFA-NS-24-037

Agency:

U.S. Department of Health and Human Services, National Institutes of Health

Item:

Notice seeking proposals that optimize promising genome editing-based therapeutic leads for Alzheimer's Disease-Related Dementias (ADRD), towards investigational new drug enabling studies. Specifically of interest are projects that characterize and optimize therapeutic lead(s) that show promise as potential genome editing therapeutics, as evidenced by convincing proof-of-concept studies in appropriate models. Upon completion, successful projects will have optimized a genome editing therapeutic candidate with demonstrated bioactivity, manufacturability, biodistribution, in vivo efficacy, and/or target engagement (measurement of proximal downstream effects) and optimal dosing, combined with other properties consistent with the desired clinical application.

Action:

Proposals are due November 19, 2024. Award amounts are up to \$1 million.

Identify and Evaluate Potential Risk Factors for Amyotrophic Lateral Sclerosis (ALS)

FON:

RFA-TS-25-036

Agency:

U.S. Department of Health and Human Services, Centers for Disease Control and Prevention

Item:

Notice seeking proposals to support research that will identify and evaluate potential risk factors contributing to Amyotrophic Lateral Sclerosis (ALS), with preferred focus on research proposals that will examine factors related to military service, contact sports, traumatic brain injury, neuroinflammation, and infectious agents. Research proposals on preferred topics can be funded under one of three funding options: Option A supports ALS risk factor research investigations that have an existing, well substantiated evidence base and would benefit from strengthened rigorous evaluation; Option B supports novel ALS risk factor research investigations that may or may not have an existing evidence base, may be supported by limited and insufficient preliminary research, and are exploratory and developmental in nature; and Option C supports research and better understanding of ALS risk including prevalence and incidence in communities such as racial and ethnic minority populations and military veterans.

Action:

Applications are due November 4, 2024. Optional letters of intent are due October 1, 2024. Awards vary by funding option.

FUNDING OPPORTUNITY:

NIH HEAL Initiative PainCare Clinician Training Program (PCTP): Mentored Clinical Scientist Development Awards (K08 - Clinical Trials Required)

FON:

PAR-24-217

AGENCY:

U.S. Department of Health and Human Services, National Institutes of Health

ITEM:

Notice seeking proposals to support a cohort of new and well-trained, independent investigators during the early-career phase to help awardees establish independent research programs in areas support by the NIH HEAL Initiatives Clinical Research in Pain Management program.

ACTION:

Proposals are due October 12, 2024. Multiple awards are anticipated.
