

Science/Technology/Engineering/Math 12/17/2024

Funding Opportunity:

EPSCoR Research Infrastructure Improvement Program: EPSCoR Collaborations for Optimizing Research Ecosystems (E-CORE)

FON:

25-523

Agency:

National Science Foundation

Item:

Notice seeking proposals to assist jurisdictions in building significant and sustainable research capacity and research infrastructure for targeted areas of focus, hereinafter referred to as “cores,” that underlie a jurisdiction's research ecosystem. Based on the evidence-based and self-identified needs of a jurisdiction, the types of cores supported by E-CORE may include (but are not limited to) development, enhancement, and/or ensuring the sustainability of: research administration; research facilities and infrastructure (including cyberinfrastructure); STEM education (K-12) pathways; higher education pathways; early career investigator pathways; broadening participation; workforce development; national and global partnerships; community engagement and outreach; technology transfer; economic development; and use-inspired research pathways.

Action:

Proposals are due July 15, 2025, and subsequently on the third Tuesday in July thereafter. An estimated 15 new awards are anticipated each year, for four year projects up to \$10,000,000.

Funding Opportunity:

EPSCoR Research Infrastructure Improvement: EPSCoR Research Incubators for STEM Excellence (E-RISE)

FON:

25-522

Agency:

National Science Foundation

Item:

Notice seeking proposals within the chosen research area that will lead to development and implementation of sustainable broad networks of individuals, institutions, and organizations, and that will transform the science, technology, engineering and mathematics research capacity and competitiveness in a jurisdiction. E-RISE is particularly interested in proposals that justify exploring emerging or interdisciplinary research areas with high potential impact. E-RISE projects must have a clearly articulated research goal that will lead to new knowledge by addressing a clear hypothesis or problem. E-RISE projects should promote (i) areas of research capacity-building within a chosen research topic; (ii) development of a skilled workforce that is relevant to the research topic, as well as the project and its outcomes; (iii) a culture of collaboration and engagement across different types of academic institutions and organizations, as well as non-academic sectors (e.g., industry and government); (iv) integration of the research with societal impacts; and (v) a clear sustainability plan to preserve the resulting research incubator's team and products beyond E-RISE funding.

Action:

Proposals are due August 12, 2025 and subsequently the second tuesday annually thereafter. An estimated 15 new awards are expected each year. Awards up to \$8,000,000 for a project at least four years with the possibility to renew for an additional three years.

Integrated Research, Education, and Extension Competitive Grants Program – Organic Transitions

FON:

USDA-NIFA-ICGP-011075

Agency:

U.S. Department of Agriculture

Item:

Notice seeking proposals to support the development and implementation of research, extension and higher education programs to improve the competitiveness of organic livestock and crop producers, as well as those who are adopting organic practices.

Action:

Proposals are due March 6, 2025. An estimated \$7.5 million is available for awards ranging from \$5,000 to \$1 million.

ROSES 2024: A.65 Responsive Science Initiatives Research

FON:

NNH24ZDA001N-RSIR

Agency:

National Aeronautics and Space Administration

Item:

Notice seeking research proposals required to address societal challenges in three thematic areas: 1) understanding and forecasting zoonotic disease events; 2) minimizing contrails in commercial aviation; and 3) downscaling earth system models to address regional and local challenges. Proposal must be based on satellite remote sensing observations, begin from application readiness level 1-3; and describe how the research leads to an application for a specific user. Proposers are encouraged to involve end users as appropriate, and innovative uses of AI are encouraged.

Action:

Notices of Intent are requested by January 24, 2025. Proposals are due March 25, 2025. An estimated \$6 million is available to fund 15 to 20 awards.

WaterSMART Applied Science Grants

FON:

R25AS00038

Agency:

Interior

Item:

Notice seeking proposals to improve access to and use of hydrologic data, develop and improve water management tools, improve modeling and forecasting capabilities. Results from these projects will be used by water managers to increase water supply reliability, provide flexibility in water operations, improve water management, and support nature-based solutions.

Action:

Proposals are due February 10, 2026. An estimated \$10 million is available to fund multiple awards of up to \$400,000. Colleges and universities must partner with states, tribes, or other organizations with water or power delivery authority. A cost share of 25 or 50% is required.

Funding Opportunity:

Chemical Evolution of the Solid Earth and Volcanology

FON:

25-516

Agency:

National Science Foundation

Item:

Notice seeking proposals to advance fundamental knowledge about the origin and evolution of our home planet including its core, mantle, and continental crust. The program encourages a wide range of laboratory, field, experimental, theoretical, and/or computational studies that explore the continuous high-temperature igneous

and metamorphic geochemical and petrologic processes that shape the Earth. Volcanology and magmatic processes, ore deposits and economic geology, and geochronology are all in the purview of this program.

Action:

Proposals are accepted at any time. An estimated \$18 million is available to fund 60 awards.

Funding Opportunity:

Life and Environments Through Time

FON:

25-517

Agency:

National Science Foundation

Item:

Notice seeking research proposals that advance knowledge about the patterns and processes relating to the origin and evolution of Earth's climate, environments, life, and sedimentary record. This research takes place at the molecular, local, regional, and global scales from the Archean Eon through the Holocene epoch.

Program supported research can be useful for predicting and planning for future global change, and for the maintenance and security of ecosystem services and human societies.

Action:

Proposals are accepted on a rolling basis. An estimated \$14 million is available to fund 50 awards.

NOAA's Transformational Habitat Restoration and Coastal Resilience Grants Under the Bipartisan Infrastructure Law Round 3

FON:

NOAA-NMFS-HCPO-2025-29526

Agency:

Commerce

Item:

Notice seeking proposals to support transformational habitat restoration projects that restore marine, estuarine, coastal, or Great Lakes ecosystems, using approaches that enhance community and ecosystem resilience to climate hazards. The program will prioritize habitat restoration projects and actions that: demonstrate significant impacts; rebuild productive and sustainable fisheries; contribute to the recovery and conservation of threatened and endangered species; promote climate-resilient ecosystems, especially in tribal, indigenous, and/or underserved communities; and improve economic vitality, including local employment.

Action:

Proposals are due April 16, 2025. An estimated \$100 million is available. Anticipated awards range from \$750,000 - \$10,000,000.

Funding Opportunity:

Security, Privacy, and Trust in Cyberspace

FON:

25-515

Agency:

National Science Foundation

Item:

Notice seeking proposals to build trust in global cyber ecosystems. Proposals must be submitted related to one of the program designations, each with their own requirements and project duration: 1) research, 2) education, 3) seeding. Trust is the core tenet of this program and, for the purposes of this solicitation, is broadly defined to include our confidence in the security, privacy, and resilience of cyberspace, particularly in the face of malicious intent.

Action:

Proposals are accepted on a rolling basis, though annual target dates will be the last Monday in September starting September 29, 2025, until March 2028. Seventy-five awards are anticipated, ranging from \$50,000 - \$1.2 million.

Structure and Physics of the Solid Earth

FON:

25-518

Agency:

National Science Foundation

Item:

Notice seeking proposals for research to advance fundamental knowledge about the ongoing dynamical processes over the age of the Earth that evolve the structure of planet Earth and underpin geohazards. SPSE supports research at all temporal and spatial scales, from the Earth's core to its crust. Through laboratory, field, theoretical, and computational studies, the program encompasses a wide range of disciplines including structural geology, tectonics, and geophysics. Research in these areas can help improve our understanding of natural hazards including earthquakes and mass flows, as well as Earth's formation and its magnetic field.

Action:

Proposals are accepted on a rolling basis. An estimated \$22 million is available to fund 60 to 75 awards.

Water, Landscape, and Critical Zone Processes

FON:

25-519

Agency:

National Science Foundation

Item:

Notice seeking research proposals on the Earth's near-surface environment and how that environment responds to change. The Program focuses on the complex interplay amongst and between hydrologic, geomorphic, and geochemical processes and how they regulate the structure and function of the Earth's near surface. These processes drive weathering and soil development, control water availability and quality, and help regulate the Earth's climate system, all of which are important for natural resource sustainability and mitigation of natural hazards. It is expected that the research funded in this program will advance fundamental knowledge in Earth surface processes, leading to transformational discoveries in Earth Sciences.

Action:

Proposals are accepted on a rolling basis. An estimated \$23,850,000 is available to fund 60-80 awards.

Notice seeking proposals to develop large-area photocathodes. Photocathodes can be found in devices such as photomultiplier tubes, image intensifiers, high-power electronics, and even free electron lasers. Photocathodes typically use low-work function metals or semiconductors and are applied in sub-micron thicknesses on planar surfaces with millimeter to centimeter-scale areas.

Build and Broaden: Enhancing Social, Behavioral and Economic Science Research and Capacity at Minority-Serving Institutions

FON:

25-505

Agency:

National Science Foundation

Item:

Notice seeking proposals to support fundamental research and research capacity across disciplines at minority-serving institutions (MSIs) and/or research collaborations with scholars at MSIs. With its emphasis on broadening participation, SBE offers Build and Broaden in order to increase proposal submissions, advance research collaborations and networks involving MSI scholars, and support research activities in the Social, Behavioral, and Economic (SBE) sciences at MSIs. Proposals that outline research projects that increase students' pursuit of graduate training, enhance PI productivity build research capacity, or cultivate partnerships are especially encouraged to apply. Proposals are invited from single principal investigators based at MSIs and from multiple co-investigators from groups of MSIs. Principal investigators who are not affiliated with MSIs may submit proposals, but must collaborate with PIs, co-PIs, or senior/key personnel from MSIs and describe how their project will foster research partnerships or capacity-building with at least one MSI as a primary goal of the proposed work.

Action:

Proposals are due January 23, 2025. An estimated \$8 million is available to fund up to 30 awards.

Funding Opportunity:

National Advanced Packaging Manufacturing Program (NAPMP) Advanced Packaging Research and Development (R&D)

FON:

2025-NIST-CHIPS-NAPMP-01

Agency:

Commerce

Item:

Notice seeking concept papers for research and development activities that will establish and accelerate domestic semiconductor advanced packaging. Because high performance computing and low-power electronics are needed for artificial intelligence and require leap-ahead advances in semiconductor advanced packaging, specific areas of interest are: (1) Equipment, Tools, Processes, and Process Integration; (2) Power Delivery and Thermal Management; (3) Connector Technology, including Photonics and Radio Frequency (RF); (4) Chiplets Ecosystem; and (5) Co-design/Electronic Design Automation (EDA).

Action:

Concept papers are due December 20, 2024. Award amounts range from \$10 million to \$150 million over a a 5 year project period.

Funding Opportunity:

ROSES 2024: A.61 INjected Smoke and PYRocumulonimbus Experiment Science Team

FON:

NNH24ZDA001N-INSPYRE

Agency:

National Aeronautics and Space Administration

Item:

Notice seeking proposals to provide the measurements and modeling required to address several critical gaps and uncertainties related to pyroconvection in the following topic areas: understanding plume dynamics linked to high-intensity fire behavior and pyrocumulonimbus (pyroCb) development; quantifying the impact of pyroCb smoke on regional and global-scale radiative forcing; including pyroCb dynamics and ensuing smoke plumes into current Earth System Models; improving fire and pyroCb monitoring from space; and advancing forecasts of pyroCb development for fire managers and community safety. PyroCbs are a poorly-understood and inadequately-predicted severe weather phenomenon driven by large and intense fires and specific meteorological conditions. These fire-generated clouds are linked to extreme fire behavior that impedes firefighting.

Action:

Optional notices of intent are due December 6, 2024. Proposals are due January 24, 2025. Up to 16 awards ranging up to \$5 million each are available, depending on project type, to support projects lasting up to five years.

FY25 Dr. Nancy Foster Scholarship Program

FON:

NOAA-ONMS-NFS-2025-28612

Agency:

Commerce

Item:

Notice seeking proposals for the Dr. Nancy Foster Scholarship Program. The program especially encourages women and members of minority groups to apply. Students should align the research proposal with the Science Needs Assessment of the Office of National Marine Sanctuaries. NOAA recognizes the student's need to ensure that scholarly research, which is often hypothesis-based, addresses critical gaps in knowledge about ecological processes, physiological mechanisms, evolutionary underpinnings, human behaviors, preferences and values, and related areas. The nature of the NOAA Office of National Marine Sanctuaries' research, as well as interactions with sanctuary staff and partners with similar goals, can help students fulfill their degree requirements through work benefiting not only national marine sanctuaries, but marine conservation more broadly and ecosystem science as a whole. In addition to natural resource studies, scholars may investigate socioeconomic, maritime archaeological and maritime heritage resource studies in national marine sanctuaries.

Action:

Required pre-proposals are due October 31, 2024. Students will be invited to submit a full proposal, which is due February 14, 2025.

Item:

Notice seeking information in three topic areas: Geoeconomic Models; Data for Geoeconomic Modeling; and User Interaction with Models. DARPA is particularly interested in capabilities and limitations of current approaches to modeling and predicting economic activity - especially with regard to the effects of economic and technology sanctions; integration of existing models into a larger ecosystem for comprehensive analysis; and novel concepts that could fundamentally improve geoeconomic modeling for national security purposes.

Action:

Responses are due by October 15, 2024 to the contact.

Funding Opportunity:

FY2025 Weather Program Office Research Program Announcement - Social, Behavioral, and Economic Sciences (SBES)

FON:

NOAA-OAR-WPO-2025-28598

Agency:

Commerce

Item:

Notice seeking proposals to involve SBES researchers and social science-led, interdisciplinary teams to integrate SBES into meteorological research, forecasting, information displays, communication of uncertainty, and understanding of individual and community vulnerabilities to weather. These disciplines include (but are not limited to) anthropology, communication, economics, geography, political science, psychology, and sociology. Specifically, this funding call supports interdisciplinary work, applied research, and more broadly, social science research that will advance theoretical findings into applications for the operational forecast community.

Action:

Proposals are due December 2, 2024. Optional letters of intent are due October 2, 2024. An estimated \$1.5 million is available for up to seven awards.

FY2025 Weather Program Office Research Programs Announcement - Air Quality Research and Forecasting (AQRF)

FON:

NOAA-OAR-WPO-2025-28603

Agency:

Commerce

Item:

Notice seeking proposals to support new weather, water, and earth system observing and forecasting applications, including improved analysis techniques, better statistical or dynamic forecast models and techniques, development of calibrated, probabilistic forecasts, and communication of that information to better inform the public. Air quality forecasting involves the use of science and technology to predict the concentration of air pollution in the atmosphere for a given location and time. Projects that have the potential to improve both air quality prediction and research by

incorporating scientific advances in chemistry modeling and inputs from the latest pollutant emission datasets will be considered.

Action:

Proposals are due **December 2, 2024**. Optional letters of intent are due **October 2, 2024**. An estimated \$1 million is available for up to three awards.

2024 Minority Serving Institutions Partnership Program (MSIPP) Notice of Funding Opportunity (NOFO)

FON:

DE-FOA-0003422

Agency:

Energy

Item:

Notice seeking applications for research practicum collaborations between EM, DOE National Laboratories, and minority serving institutions, with support available for curriculum design, professional development, and the purchase of specialized equipment and instrumentation for field and laboratory-based studies. The goal is to build capacity at minority serving institutions (MSIs) through collaborative research that will develop and broaden participation in the environmental cleanup field and workforce, and build career pathways for underrepresented groups. Eligible research topic areas include Deactivation & Decommissioning (taking a facility to its final disposition end state); Digital Technologies; and Robotics.

Action:

Required expressions of interest are due October 4, 2024. Required concept papers are due October 15, 2024. An informational webinar will be held September 19, 2024 at 11:00 a.m. (ET) - see the solicitation for details. Approximately \$15.5 million is available to fund 5 to 10 awards ranging from \$1 million to \$3 million each are available. Eligibility is limited to MSIs with a student population less than or equal to 5,000. Non-MSI subawards are unallowable and subawards to MSI's with more than a 5,000 student population cannot exceed 20% of the total grant or cooperative agreement award value.

Cultural Anthropology Program - Doctoral Dissertation Research Improvement Grants

FON:

24-605

Agency:

National Science Foundation

Item:

Notice seeking proposals to support basic scientific research on the causes, consequences and complexities of human social and cultural variability. Contemporary cultural anthropology is an arena in which diverse research traditions and methodologies are valid in investigations of human cultural variation. Recognizing the breadth of the field's contributions to science, the Cultural Anthropology Program welcomes proposals for empirically grounded, fieldwork/lab-based theoretically engaged and methodologically sophisticated research in all sub-fields of cultural anthropology. Because the National Science Foundation's mission is to support basic research, the NSF Cultural Anthropology Program does not fund research that takes as its primary goal improved clinical practice, humanistic understanding or applied policy.

Action:

Proposals are due January 15, 2025. An estimated \$800,000 is available to fund 40 to 50 awards.

Multilateral Partnerships Leveraging Excellence

FON:

PD-24-7298

Agency:

National Science Foundation

Item:

Notice seeking proposals for visionary, and ambitious international multilateral research partnerships that are required to hasten progress in addressing grand challenges by leveraging research excellence in the U.S. and around the globe. The program also seeks to advance understanding of effective multilateral collaboration. Especially encouraged are proposals that 1)Address urgent research and/or societal challenge of global importance (including but not limited to critical and emerging technology research) and require an inherently international multilateral approach to achieve impactful research results, partnering with at least two countries other than

the U.S. Proposals that engage partners across distinct geographic regions are an area of interest. 2) Make clear how the proposed international collaboration will enable research advances and broader impacts that go beyond what can be accomplished by a narrower team. 3) Include a diverse group of U.S. institutions and/or individuals, leveraging the full range of talent that society has to offer. Project funds support the U.S. research team. Research partners should seek funding from their own national funding agencies or from other sources.

Action:

Proposals are accepted anytime and award amounts will vary.

Pathways to Enable Open-Source Ecosystems

FON:

24-606

Agency:

National Science Foundation

Item:

Notice seeking proposals for projects to harness the power of open-source development for the creation of new technology solutions to problems of national and societal importance. The program is specifically focused on the translational pathway – supporting the transition from open-source research artifacts to open-source ecosystems (OSE). POSE aims to support new managing organizations to catalyze distributed, community-driven development and growth of new OSEs. This solicitation seeks two types of proposals, allowing teams to propose specific activities to scope and plan the establishment of an OSE (Phase I), and to establish a sustainable OSE based on a robust open-source product that shows promise in the ability to both meet

an emergent societal or national need and build a community to help develop it (Phase II).

Action:

Proposals are due January 14, 2025. An estimated \$27.8 million is available to fund up to 50 awards.

Science/Technology/Engineering/Math 9/03/2024

Funding Opportunity:

Advancing Informal STEM Learning

FON:

24-601

Agency:

National Science Foundation

Item:

Notice seeking proposals for projects that support research and practice that further illuminates informal STEM learning's role in engagement, broadening participation, and belonging in STEM; personal and educational success in STEM; advancing public engagement in scientific discovery; fostering interest in STEM careers; creating and enhancing the theoretical and empirical foundations for effective informal STEM learning; improving community vibrancy; and/or enhancing science communication and the public's engagement in and understanding of STEM and STEM processes. The AISL Program funds five types of projects: (1) Synthesis; (2) Conference; (3) Partnership Development and Planning; (4) Integrating Research and Practice; and (5) Research in Support of Wide-reaching Public Engagement with STEM.

Action:

Proposals are due January 8, 2025. An estimated 77 awards are available, with amounts varying by project type.

Funding Opportunity:

Deployed Warfighter Protection (DWFP) Program for the Protection of Deployed Military Personnel from Threats Posed by Arthropod Disease Vectors

FON:

AFPMB-BAA-25-01

Agency:

Defense

Item:

Notice seeking proposals for original and innovative research that supports the development of new insecticides, or improved formulations of existing insecticides for vector control, new technology or enhanced modalities of personal protection from biting arthropods, or improved efficacy and sustainability of equipment for application of pesticides. Applications must address at least one of these FY25 DWFP Program Research Areas: bite prevention, vector control, decision support tools or software applications, vector surveillance and identification, and/or vector pathogen diagnostics.

Action:

Required pre-proposals are due October 4, 2024. Invited proposals are due January 28, 2025. An estimated \$5 million is available to fund up to six awards.

ROSES 2024: A.60 Earth Action: Ecological Conservation

FON:

NNH24ZDA001N-ECON

Agency:

National Aeronautics and Space Administration

Item:

Notice seeking proposals for projects that apply Earth observations to improve or develop decision-making activities in ecological conservation and management. Any area of ecological conservation is welcome (e.g., invasive species, protected area management, fisheries or wildlife management, habitat restoration, ecosystem services, rewilding, biodiversity protection). The program welcomes proposals looking at any biome (terrestrial, A.60-2 freshwater, marine, or airborne) or geography. All projects must combine three components: NASA Earth observations, in situ biological observations, and ecological models to develop decision-support tools.

Action:

Proposals are due March 14, 2025. Notices of intent are requested by February 14, 2025. An estimated \$3 million per year is available to fund 10 to 20 awards.

Announcement for Partnership Proposals (AFPP) For One or More Partnership Agreements Related to University Capstone Projects

FON:

NNH24NOC001

Agency:

National Aeronautics and Space Administration

Item:

Notice seeking proposals from colleges and universities to partner with NASA on students' capstone projects in an effort to better prepare cross-disciplinary undergraduate and graduate students for increasingly complex and challenging STEM career pathways by providing real-world collaborative research experiences. Consistent with university requirements, students will either earn college credit for their participation in the capstone or the capstone will otherwise contribute to their academic coursework. NASA OSTP will coordinate with university faculty to support the identification of relevant areas of research, issues, or problems that the student team can use to develop specific studies.

Action:

Proposals are due September 20, 2024.

Item:

National Technology & Engineering Solutions of Sandia (NTESS) seeking to collaborate with non-federal entities (NFEs) to leverage a broad spectrum of talent and capabilities. A CRADA Participant benefits from Sandia's programs and capabilities to potentially improve products/technologies for increased commercialization opportunities, furthers understanding of fundamental science in academia, and/or provides cutting-edge capabilities to help ensure our nation's security. What distinguishes a CRADA from other technology transfer mechanisms is the collaborative nature of the work; through a CRADA a Participant and NTESS will work together as collaborators.

Action:

Expressions of Interest are due February 19, 2025.

2025 Sea Scallop Research Set Aside Program

FON:

NOAA-NMFS-GARFO-2025-27203

Agency:

Commerce

Item:

Notice seeking projects that enhance the knowledge of the scallop fishery resource or contribute to the body of information on which scallop management decisions are made. Priority will be given to proposals that investigate research priorities developed by the New England Fishery Management Council, which are detailed under the Program Priorities section of the announcement.

Action:

Proposals are due September 30, 2024. Successful applicants will be awarded scallop RSA quota. No federal funds are provided for research under this notification. Rather,

proceeds generated from the sale of RSA quota will be used to fund approved activities and compensate scallop vessel owners.

FY 25-29 Strategic Trends Research Initiative Broad Agency Announcement

FON:

Agency:

Defense

Item:

Notice seeking proposals for strategic research on challenges related to weapons of mass destruction (WMD) 5–10 years in the future in support of the mission of the Defense Threat Reduction Agency (DTRA). Within DTRA, the Strategic Integration Directorate (SI), Strategic Trends Office (SI-ST) research explores a range of challenges related to nuclear, chemical, and biological weapons, including the development of

materials, methodologies, or technologies with potential to create new or increase the impact of existing WMD threats. SI-ST primarily focuses on future implications for the U.S. and its allies and partners in areas of deterrence, crisis and conflict prevention, risk reduction, arms control, escalation management, strategic competition, and prevailing during conflict with chemical, biological, radiological, and nuclear possessing adversaries.

Action:

White papers are accepted on a rolling basis until August 1, 2029. An estimated \$35.88 million is available, past funding has ranged between \$50,000 to \$1.3 million per award.
