IN STUDENTS' OWN WORDS

Building confidence in statistics

"Yes, I was honestly scared to take Educational Statistics after the first homework assignment using the resources provided to me it became less and less scary." — EDRS 4600, Fall 2024, [p. 26](#)

"...I typically struggle with statistics and the course was set up in a way that I was able to understand the content." — EDRS 6600, Fall 2023, [p. 50](#)

Responsive, individual support

"The instruction was very responsive and reached out to students when they were struggling." — EDRS 4600, Fall 2022, [p. 62](#)

"Yes - Dr. Wang is very kind, he motivates his students and always responds to emails to offer feedback and guidance." — EDRS 4600, Fall 2021, [p. 74](#)

Accessible, affordable resources

"...the videos to each module, basically simplified our course work. everything was free!" — EDRS 4600, Spring 2026, [p. 6](#)

"I loved the videos too. I took my time to watch and rewatch concepts I didn't understand." — EDRS 4600, Fall 2022, [p. 62](#)

Guiding graduate and doctoral learning

"Dr. Wang offers guidance and helpful walkthroughs of the content. I followed his recommendations and did well in the class." — EDRS 6610, Fall 2025, [p. 14](#)

"This college needs more professors like this one." — EDLD 6040, Spring 2026, [p. 8](#)

About these data. Figures summarize every institutional Class Climate report for Dr. Wang's sections from Fall 2021 through Spring 2026 (items 1.2–1.11, five-point scale). Sections are small (2–8 evaluations each) and the response rate was 39% (90 of 231 enrolled, where reported); students in paired courses may have evaluated both. Quotations are excerpts. The complete, unedited reports follow on pp. 2–74, including all written comments; page references are clickable, and the file is bookmarked by term and course.

- The instructor made sure to provide a lot of resources to get the work done.
- The professor had videos that he recorded and available at any time the student needed to watch. There are other resources available that the professor posted online.
- The strengths were that he provided video explanations of the content to help us with homework and quizzes.

2.2) What suggestions for improvement do you have for the course and/or instructor?

- Honestly he did very well with everything. The information was highlight or linked.
- I would suggest that the homework and quizzes should have multiple attempts and they should not be timed. It's hard to pass this class because you only get one attempt to take a quiz and the homework. We don't have any extra credit either and the questions are difficult to understand especially when we aren't good with math.
- no suggestions
- No suggestions at this time.
- Post students current grade on canvas

2.3) Would you recommend this instructor? Why or why not?

- I would not recommend him
- I would recommend this instructor because he is motivated for student success and will answer student questions.
- Yes! He really works hard on getting his students to pass the class. As long as you follow along, you will do good on his assignments/quizzes.
- Yes, I would because of the knowledge he possess about this subject. How organized he was and how he did not stress me out.
- Yes, I would recommend this instructor. I feel like I learned a lot.

2.4) Use the space below to add any additional comments about this course and/or instructor.

- I don't think this course should be used as a pre-requisite for the sped masters program especially when you have to take it your senior year and it's stressing to pass this class. I don't see how this connects to education or how I will use this as a teacher.
- N/a
- Overall great experience.

2.1) What were the strengths of the course and/or instructor?

- Feedback from the instructor, and resources.
- Instructor is encouraging.
- The practice quizzes were the most helpful.
- Videos were helpful

2.2) What suggestions for improvement do you have for the course and/or instructor?

- I might be the only person here who thinks this, but I wanted to do more math. At least have us generate our own data and learn to input from scratch. It would have been great to have this be more project based, seeking to gather data, input data, analyze data, and interpret the data.
- It would be helpful if the closed captions matched the professor's lectures. Currently they are as is, which is confusing.
- none
- no suggestions

2.3) Would you recommend this instructor? Why or why not?

- I would recommend the professor for in person instruction, maybe. I think it would have been helpful to be able to ask clarifying questions in real time.

2. Student feedback

2.1) What were the strengths of the course and/or instructor?

- A strength is that the instructor was very familiar with the content. It was also helpful that he provided prerecorded videos that could be watched multiple times which made it easier to understand the content.
- Dr. Wang returns emails in a timely fashion. Dr. Wang's course is clearly laid out. It is clear that he uses the same course over and over so it is a well oiled machine for him.
- He had video that went with each lesson. The practice quizzes were helpful.

2.2) What suggestions for improvement do you have for the course and/or instructor?

- I worked extremely hard for this course, studying well beyond the allotted time frame. I was disappointed to still miss quiz questions. Maybe allow students to retake the quizzes for partial credit. I watched your videos over and over. It seems that in the videos you read the core material to us. The answers are clear to you, but they were not clear to me. Perhaps rework the videos to be more clear to people who are not familiar with statistics? The external videos you chose were helpful.
- None
- The content was hard to understand. I would give more examples and explain the content in more detail. I had to watch the videos and read the content several times before somewhat understanding the concepts. I would provide a little more support to the students who don't understand.

2.3) Would you recommend this instructor? Why or why not?

- I would probably not recommend this professor. Statistics is already a difficult course. Although Dr. Wang does return emails in a timely fashion they are often not helpful. He will tell you to refer back to the same material that you have a questions about, or tell you to ask classmates. I would not have survived this course without my weekly study sessions with my classmates.
- I would recommend this instructor because I typically struggle with statistics and the course was set up in a way that I was able to understand the content. The instructor did a really good job of responding to student questions in a timely manner. Clear expectations were set from the beginning.
- No, he is nice but hard to understand
- No, very hard to understand and does not explain issues clearly.

2.4) Use the space below to add any additional comments about this course and/or instructor.

- The instructor was prompt with grading student work. I appreciate his availability to answer questions and to provide immediate feedback.

2.1) What were the strengths of the course and/or instructor?

- ☒ Dr. Wang provided all of the materials we needed to be successful on our quizzes and assignments.
- ☒ Dr. Wang returns email in a timely fashion, and it is clear that he has been teaching this course for a long time. His course is a well oiled machine for him, and he is very knowledgeable in statistics.
- ☒ He was enthusiastic about the content he was teaching. He tried to explain the content in videos. The practice quizzes were helpful.
- ☒ The professor clearly knows the content. He was well prepared to teach the course.

2.2) What suggestions for improvement do you have for the course and/or instructor?

- ☒ Give students more than one opportunity to take the quizzes. Do not tell students to refer to the course material they already do not understand when they ask you a question. Understand that the core material is very clear to you, but for a non-statistical brain it is not clear.
- ☒ Have an exemplar of papers who scored well. Have a rubric that shows point values. Explain the concepts more clearly on the videos.
- ☒ I love have loved to see a more detailed rubric for the writing assignment.
- ☒ None

2.3) Would you recommend this instructor? Why or why not?

- ☒ If there was another choice for statistics, I would be willing to try. Dr. Wang is very kind, but he is not very supportive when you have questions.
- ☒ I would recommend Dr. Wang because he gave us everything we needed to be successful in his course.
- ☒ I would recommend this instructor because he knows how to make the content accessible to students.

2.1) What were the strengths of the course and/or instructor?

- All the videos and the kind words were very encouraging!
- Instructor was very quick to respond to any questions.
- Providing examples and checking up on the students to make sure they understood the assignment.
- The instruction was very responsive and reached out to students when they were struggling. He genuinely wanted to work with students to make sure they were comprehending and accessing the content.
- The instructor is very organized and follows the syllabus dates. Also, he provides you with practice questions that prepare you for the quiz or homework assignment. He truly cares about the students and their success and responds to your emails promptly.
- Videos and notes available.

2.2) What suggestions for improvement do you have for the course and/or instructor?

- Except for some links to a UCLA resource on SAS and a couple other links the course content was limited to simply a word document for each unit. Videos provided were primarily of the instructor reading the unit notes word doc back to us which made it in many ways more confusing. A well written textbook on educational statistics with lots of pertinent examples and visual representations would have helped this course tremendously. PowerPoint presentations from the instructor with more relevant examples would have helped too. It was extremely difficult to determine why or when we would use these statistical methods as an educator from the current course content we were provided. Not being able to make that connection to real life left me feeling lost and the information did not feel cohesive or relevant to anything I was doing as an educator.
- For grades section to be available.
Add extra credit assignments.
- My only suggestion would be providing an answer key for the practice questions. This will allow students to know if they are understanding the material by comparing their answers to the correct answer key.

2.3) Would you recommend this instructor? Why or why not?

- NA
- No and Yes. Hard to understand subject but alot of useful information
- Not at this time. He's very helpful and quick to respond but doesn't appear to know how to successfully teach this subject. I'm sure he himself knows educational statistics very well but he needs to find ways to make this course content more connected to teachers in the classroom and provide multiple modes of representation to help us assimilate the information.
- Yes, he is very organized and truly cares about the student's outcome in his class. As long as you do your part, this class will teach you a lot.
- Yes, the instructor is very accommodating and wants his students to succeed by providing office hours and explanations of concepts.
- Yes. He works with students to make sure they are on track to be successful within the class.

2.4) Use the space below to add any additional comments about this course and/or instructor.

- Dr. Wang is an excellent professor and works with his students to improve their understanding of statistics.
- I just want to thank Dr. Wang for a great and successful semester!
- I really enjoyed the class and I have a better understanding of the concepts. I loved the videos too. I took my time to watch and rewatch concepts I didn't understand.
